| E                                                  | <p><b>Purpose / Propósito:</b> Allow air flow to a second air compressed reservoir if a certain regulated pressure is reached in the first reservoir. This is useful to give priority to the filling of air from one circuit over another one (for example: priority of filling brake circuit instead of suspension circuit) / Permitir el paso de aire hacia un segundo depósito de aire comprimido si en el primer depósito se alcanza una determinada presión regulada en la válvula. Esto sirve para priorizar el llenado de aire de un circuito frente a otro (por ejemplo: prioridad de llenado de circuito de frenos frente a circuito de suspensión)</p> <p><b>Installation requirements / Requisitos para la instalación:</b> To install the valve directly into the air reservoir inlet using the appropriate connection. / Instalar la válvula directamente en la entrada del depósito de aire usando la conexión oportuna.</p>                                                                                                                                                                                                                          |                |      |        |                   |                                                                                       |                                                                                       | E                  |                                                   |                |                                       |                       |             |                                                                                       |                                        |         |                                              |            |                                                    |                    |               |        |  |  |         |   |  |  |  |               |  |  |  |  |  |  |    |          |      |        |                   |          |   |          |  |  |  |  |   |           |                |  |  |  |  |  |          |               |         |  |  |  |  |  |   |          |                                                                                       |  |  |  |  |  |   |           |           |
