Purpose / Propósito:

Application of service brake system through the pedal actuation by the driver. This valve includes a displacement sensor which informs ECU braking about the position of the brake pedal. / Aplicación del freno de servicio mediante la actuación del pedal por parte del conductor. Esta válvula incluye un sensor de desplazamiento que informa a la ECU de frenos sobre la posición del pedal de freno.

Installation requirements / Requisitos para la instalación:

The design of the foot brake valve, acting on seat, must guarantee the maximum way of the push rod that is necessary to control the valve even in case of failure in the circuit I. Mounting is accomplished with two M8 mounting bolts. / El diseño de la válvula de freno de pie, accionándolo desde el asiento, debe garantizar el máximo recorrido de la varilla de empuje que resulta necesario para el accionamiento de la válvula, incluso en caso de que falle el circuito I. El montaje se efectúa con dos pernos de montaje M8.
