Technical sheet / Datos técnicos:																																																																																			
Part number adaptable to / Referencia adaptable a												4757210110																																																																							
Supply pressure / Presión de alimentación												max. 13 bar																																																																							
Control pressure / Presión de pilotaje												max. 10 bar																																																																							
Regulation index / Índice de regulación												1.5 : 3																																																																							
Permissible medium / Medio de funcionamiento												Air / Aire																																																																							
Operating temperature range / Rango de temperatura												-40°C to / a +80°C																																																																							
Weight / Peso												1600 gr

Purpose / Propósito: The automatically control braking force on the air brake chambers of vehicles with air suspended axles. Automatic control is dependent upon the air bag pressure which corresponds to the vehicle load. / El control automático de la fuerza de frenado en las cámaras de freno de aire comprimido de los vehículos con ejes dotados de suspensión neumática. El control automático depende de la presión del colchón neumático que corresponde a la carga del vehículo. Installation requirements / Requisitos para la instalación: The valve must be installed vertically with the exhaust port (3) pointing downwards. Mounting is accomplished with two screws M10. / La válvula debe fijarse verticalmente con el escape (3) orientado hacia abajo. El montaje se realiza con dos tornillos M10.
